Functional

Appia II has the same functionality and features of our top-rated machines, such as two inox steam wands, hot water wand and raised group heads.

Comfortable

Appia II has affirmed all the features that have already made the previous version highly ergonomic, that makes daily operation easy for a barista.

Perfect Brewing

The SIS (Soft Infusion System) guarantees a soft and creamy espresso shot.

Performance

Along with the high quality brewing, Appia II prepares creamy and velvety steamed milk with its turbocream system.

Versatile

With groups at standard height or risen to adapt to the different needs of use.

Essential

With its modern style and optional colors, Appia II suits any type of location.

New Aurelia Wave

The new Aurelia Wave is the first professional coffee machine with a remote control interface so comprehensive and easy to use. With a simple touch you will have full control over all the steps of extraction, preparation, dispensing and cleaning. Every technical aspect of the machine will be under your eyes. To improve your performances easily, the Espresso Management System allows you to view hourly, daily, weekly and monthly statistics with the possibility to compare them and find the best practices. All information is at your fingertips, even from your smartphone. We are well aware that the quality of the coffee you offer in your shop is also the result of your daily efforts, so besides improving coffee, we are also committed to improving your work.

Aurelia Wave

- Allows you to have full control over its performance.
- Reports critical issues allowing your timely intervention.
- Allows you to easily monitor and improve quality performance and consumption.
